PROFESSIONAL SUMMARY

Henry Le is a Frontend Developer at Volatile Studios. Committed to communicating with clients to produce a quality product. Keen to adapt to the task at hand, which in turn allowed him to design, construct, and execute. Eager to continue absorbing the ever-evolving technologies that is the world of programming and determined to improve his problem solving skills.

Alumni from Coding Dojo bootcamp and achieved highest honors with "Triple Black Belts" showing advanced proficiency in each stack.

EXPERIENCE

Volatile Studios

July 2021 - Present

Web Developer and UI/UX Designer working with custom web development, design, application building/integration, multimedia, apps, content management systems, mobile interactivity and ecommerce platforms.

Linguiyo

January 2021 - June 2021

Full Stack Developer in charge of constructing dashboard and integrated backend to frontend through REST APIs.

WORK PROJECTS

(More on my portfolio)

DropTonic

Designed and developed an ecommerce website with complex components such as intricate sliding animations using vanilla JS. Adopted a third-party software BigCommerce for our client's shop page.

California Local Technical Assistance Program

Cooperated with California State University, Long Beach and CALTRANS to revamp the California State's LTAP existing website for a completely new look. Resulting in an intuitive experience and informational content.

Bisa

Revitalized entire site using existing components and client's feedback to design and construct a elegant website. Integrated Ecwid's API to allow customers a quick and secure purchase interaction.
